

ARMADILLO AS-30

INFRARED / VISIBLE FRIEND OR FOE IDENTIFICATION AND EMERGENCY STROBE

GENERAL FEATURES

ARMADILLO AS-30 Infrared / Visible Friend-or-Foe Identification and Emergency Strobe is a tactical marking device developed for the safe identification of personnel and units in military operations, operating in both the visible and infrared spectrum.

Its full compatibility with night vision systems enables rapid and clear identification while maintaining operational concealment. The rugged, mission-focused housing provides high resistance to harsh environmental conditions. With steady and strobe modes, it offers flexible adaptation to different mission scenarios. Thanks to its synchronization and team-forming capabilities, it can be configured for coordinated and simultaneous group operations.

SPEC SUMMARY

Usage	Helmet
LEDs	Red / Green / White / IR / SWIR
Operating Mods	Steady / Strobe / Programmable
Brightness Adjustment	5 Level (For All LED Options)
Synchronization	Inter-Team Synchronization
Vibration Option	YES
Environmental Standards	MIL-STD 810G-H

LED
OPTIONS
5

WEIGHT
<55g

DIMENSIONS (mm)
80 x 40 x 55

*A tolerance of ±10% applies to all parameters.
